

A big year for DSV

It all started outside of Roskilde, Denmark, on 13 July 1976 by business developer [Leif Tullberg](#) and nine independent trucking companies.

The company worked out of Leif's and his wife, Dots own home for many years. It operated as a cartage department for the owners and only handled contracting haulage and deliveries. But soon, the vision became to enter the international transport market, and today acquisitions are an integrated part of DSV's growth strategy.

In just 45 years, the company went from 10 to 56,000 employees. That's a quite impressive journey. Read more about DSV, their strategy, business areas and career opportunities at <https://social.dsv.com/2QF>
